- Tools: GitHub, Microsoft, Excel function, statistical analysis
- Web Development: HTML, CSS, Proficient in MySQL, AIML knowledge at an intermediate level

PROJECTS

Employee Management System --- Web App

Developed a production-level Employee Management System for the university using Spring MVC, JPA, Thymeleaf, and MySQL, deployed to function exclusively within the Banasthali intranet. Implemented layered architecture (Controller–Service–Repository) with bean validation and custom business rules. Handled database integrity issues and implemented features like report generation, user authentication also using server-side technologies for smart card alpha-numeric id generation logic. Designed clean admin workflows for add, edit, view, and delete employee records.
